1) Sign up / Login Page

2) Search box

3) Shopping Cart

4) Checkout Page

5)Product pages

Front-end:

HTML

CSS

JavaScript

{to create the UI}

Back-end:

FireBase (noSQL database) + JavaScript

(Similar to AWS) (It's also free)

- Use it for Database

- Also works for Authentication

- We can also host the website using Firebase when we're finished
